

Metronomo

Enabling scaling of quantum computers

Reference clock

Internal OCXO, frequency stability ± 0.5 ppb
External: 1 MHz – 750 MHz

7 clock outputs

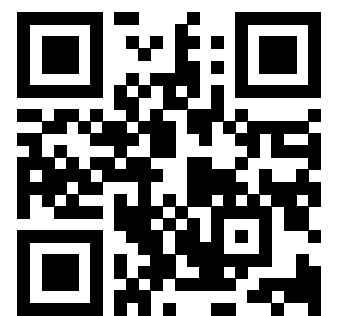

Up to 3 GHz
Phase noise -125 dBc/Hz at 1 GHz carrier 10 kHz offset

7 SYSREF outputs to synchronize

Presto units
other metronomo units
other JESD204B-compatible devices

Configurable via LAN

*Available in July 2023

More about Metronomo
